EDUCATION

University of Maryland

College Park, MD

Bachelor of Science in Computer Science

GPA: 3.57 | *December 2026*

- Completed coursework in Data Structures & Algorithms, Programming Languages, OOP I & II, and Computer Systems.

EXPERIENCE

Software Engineer Intern

June 2025 – Present

Xometry – AI-driven marketplace for custom manufacturing

Bethesda, MD

- Architected and largely delivered a backward-compatible migration from legacy MongoDB part models to a GraphQL Parts API using Python, FastAPI, and Statsig feature flags, migrating 30+ services while supporting tens of thousands of daily jobs without downtime.
- Established AWS EventBridge and Amazon SQS infrastructure using Terraform and Python/TypeScript/FastAPI to establish a new outsourcing service, implementing event producers, consumers, queues, and service-to-service integrations that process thousands to approximately 50,000 daily outsourcing plan-creation events.
- Designed and implemented a TypeScript customer-part-requirements-to-manufacturing-capabilities mapping frontend and backend APIs across 3+ services, visualizing hierarchical manufacturing requirements and enabling internal teams to safely edit partner-matching rules affecting approximately 10,000 partners.

Substitute Teacher

February 2025 – Present

Montgomery County Public Schools

Rockville, Maryland

- Delivered classroom instruction using MCPS lesson plans to maintain continuity across assigned classes.
- Coordinated with administrators and support staff to adapt lessons and manage classroom operations.

PROJECTS AND FREELANCE WORK

CallHawk | *TypeScript, FastAPI, React, MongoDB*

August 2025 – Present

- Built a multi-tenant IVR receptionist using FastAPI, MongoDB Atlas, and React to support home-service SMB workflows.
- Deployed cloud environments using Render to streamline development and production releases.
- Shipped IVR triage, voicemail-to-text, and a CRM-lite dashboard to reach 500ms median missed-call notification time.
- Integrated Twilio Voice and SMS with verified webhooks and structured logging to improve messaging reliability and auditability.
- Implemented tenant-scoped auth using Clerk to prevent cross-tenant access across requests, data models, and Twilio configs.

Behaviorist | *TypeScript, Express.js, React Native, PostgreSQL*

December 2024 – Present

- Built a cross-platform habit tracking app using Express.js, PostgreSQL, and React Native to support daily logging and progress tracking.
- Designed a mobile-first interface using React Native and TypeScript to improve responsiveness and usability.
- Implemented RESTful APIs using Express.js to enable real-time habit logging and analytics.

Stretch With Donna (Freelance) | *React, TypeScript, Tailwind CSS*

January 2025

- Developed and deployed a responsive business website using React, TypeScript, and Tailwind CSS to strengthen the client's online presence.
- Implemented CI/CD and Vercel hosting to enable fast, reliable deployment.
- Collaborated with the client to gather requirements and iterate on features, including a contact form.
- Launched the site at **stretchwithdonna.com** to provide a public marketing presence.

TECHNICAL SKILLS

- Languages and Databases:** TypeScript, Python, SQL (PostgreSQL), MongoDB, OCaml
- Web/Backend:** React, Node.js, Express.js, FastAPI, HTML/CSS, Tailwind CSS
- DevOps:** Terraform, AWS, Scalr, GitHub Actions (OIDC)
- Developer Tools:** Git, VS Code, Cursor, Insomnia, Linux Command Line
